

CARE 2 COMMUNITIES

2022

ANNUAL REPORT

Our mission is to create a model for sustainable, community-based healthcare in Haiti that empowers people to live healthier lives.

The strength, dedication, and resilience of the communities we care for inspire us to continue our vision of providing accessible, affordable, high-quality healthcare today and in perpetuity.

TO OUR SUPPORTERS

Dear Friend,

Over the past decade, your ongoing support has allowed Care 2 Communities to transform lives. Since 2010, we've cared for Haiti's most vulnerable populations, adapting our model to make the most impact and provide a long-term solution to healthcare deficits in Northern Haiti.

And while Haiti has faced many uncertainties throughout 2022, C2C remains an anchor of care within the communities we serve. Our public-private partnership with Haiti's Ministry of Health ensures that low-income people can access healthcare no matter what. You have helped us keep our doors open despite recent violence, fuel shortages, rising inflation, and disease outbreaks. **You are part of our community of individuals and foundations who believe in our healthcare model and its ability to change how healthcare is delivered in one of the world's most challenging health markets.** Because of you, we can treat and prevent illness now and well into the future.

As we look ahead, we will continue to adapt our services to reach more people at the community level, expand our maternal and pediatric programs, and implement changes to increase immunization rates, preventative care, and follow-up visits. With your ongoing support, we will continue to transform lives. I am honored to share our year's successes and plans for the future.

Thank you for being an integral part of the C2C community.

In gratitude,

Racha Yehia

THE PROBLEM

HAITI'S HEALTHCARE SYSTEM REMAINS FRAGILE AND FINANCIALLY PRECARIOUS. COMMUNITY-BASED CLINICS, CREATED TO SERVE AS THE BACKBONE OF THE PUBLIC HEALTH SYSTEM, ARE PROFOUNDLY UNDER-RESOURCED, LACK MANAGEMENT AND FINANCIAL HEALTH, AND AREN'T ABLE TO OFFER QUALITY SERVICES TO THOSE IN NEED.

OUR SOLUTION: PUBLIC-PRIVATE PARTNERSHIP

WE PARTNER WITH HAITI'S MINISTRY OF HEALTH TO ENHANCE PATIENT OUTCOMES IN NORTHERN HAITI BY IMPROVING THE INFRASTRUCTURE, SERVICE QUALITY, AND OPERATIONAL EXCELLENCE OF UNDERPERFORMING GOVERNMENT CLINICS. OUR MODEL HARNESSES STRENGTHS OF THE PUBLIC SECTOR AND INTEGRATES BEST PRACTICES AND INNOVATION FROM THE PRIVATE SECTOR TO DELIVER SUSTAINABLE HEALTHCARE SERVICES IN ONE OF THE WORLD'S MOST CHALLENGING HEALTH MARKETS. *IN HAITI, PATIENTS PAY FOR HEALTHCARE. C2C CLINICS' BELOW MARKET-RATE FEES GENERATE REVENUE TO FUEL SUSTAINED SERVICES. WE STRIVE TO ENSURE THAT PRICES ARE LOW AND ACCESSIBLE TO PATIENTS.

LOCAL "ONE-STOP-SHOP"

EACH CLINIC PROVIDES DOCTOR & NURSE CONSULTATIONS, A PHARMACY, AND LABORATORY TESTING UNDER ONE ROOF. WE ALSO OFFER MATERNAL HEALTH SERVICES, FAMILY PLANNING SERVICES, AND CHILD MALNUTRITION SERVICES AT MOST OF OUR CLINICS.

OUR PROGRAMS

COMMUNITY HEALTH

Only 23% of the entire population of Haiti – including just 5% of the rural population – has access to high-quality primary care, despite over 90% living within 5km of a health facility. Our Community Health Workers visit households to follow up with patients, convene weekly health screenings, and promote healthy behaviors, nutrition, and vaccination coverage through education.

MATERNAL HEALTH

According to the National Institutes of Health, Haiti has the highest maternal and neonatal mortality rates in the Western Hemisphere. Our Maternal Health Program offers mothers consultations by an OB-GYN/midwife/nurse; two ultrasounds; all necessary lab tests, medications, vitamins, birth planning, and counseling.

SEXUAL & REPRODUCTIVE HEALTH EDUCATION FOR ADOLESCENTS

We offer peer cohort-based education to girls and boys about anatomy, contraception, gender-based violence, sexually transmitted diseases and consent. In 2022, we welcomed over 438 adolescents into the 20-week long program

FAMILY PLANNING

We provide unbiased family planning counseling, empowering patients to make the best decisions for their reproductive health. We provide short-term and long-term family planning methods.

PEDIATRIC CARE

In Haiti, 6 in 10 children are not fully vaccinated. Pneumonia accounts for 40% of child mortality in children ages 1-5. The need for high-quality, affordable health services for children in Haiti is urgent. C2C clinics care for over 15,000 children annually, providing vaccinations and screenings for pneumonia, anemia, and other illnesses

C2C IS THANKFUL FOR THE LASTING KINDNESS OF GERALD & MAUREEN SHEEHAN, JACK
CONNORS, AND MILTON MILLMAN, WHOSE CONTRIBUTIONS HAVE ENABLED C2C TO
CREATE A BLUEPRINT FOR THE FUTURE OF HAITI'S HEALTHCARE SYSTEM.

LOOKING AHEAD

We are committed to increasing the reach of our healthcare services through operational and programmatic expansion while continuing to evaluate the impact of our core primary care service model on the health outcomes of the patients we serve.

Over the next year, we plan to:

- tackle the pediatric immunization gap through health education programs, clinician/patient counseling, and utilizing community health workers to reach children in their homes
- expand our maternal health program by increasing the number of days we offer antenatal consultation, implementing the program in more clinics, and leveraging our community health nurses
- adopt new interventions to meet people in their homes and eliminate barriers to care, like high transportation costs, by expanding our community health program.

We believe that public-private partnership in healthcare is the most effective, sustainable way to strengthen healthcare in developing countries. Our model harnesses the assets of the public sector, leveraging medical expertise and systemic capabilities, and integrates best practices and innovation from the private sector to deliver best-in-class, sustainable healthcare services in one of the world's most challenging health markets. As we look globally at healthcare needs and opportunities, C2C is dedicated to sharing information about the success of our operations and replicable business model.
